PART I. EMPLOYMENT, HOURS AND EARNINGS -- CALENDAR YEAR ENDING IN 2021

8. Total Average Number of Employees (Electric Employees): *

Average annual employment should be computed by summing the number of employees for all 2021 pay periods, then dividing the sum by the total number of such pay periods in the year. For example, if employees are paid semi-monthly, there would be 24 pay periods. The number of employees on the payroll for each of the 24 periods should be summed, and the total divided by 24.

Prorate the number of employees allocated to, or from, other departments (e.g., gas or water) of a multiple utility, or other government units (e.g. general administration). For example, in a multiple utility (a utility with functions besides electric) that has one accounting department for all municipal utility operations, prorate personnel allocated to electric utility operations. Another example would be a secretary employed by the municipality that handles some electric utility affairs. Only report the hours dedicated to the electric utility.

Full-Time:

Part-Time:

9. Total Annual Earnings (Electric Employees): *

Provide total direct earnings for 2021. Include all wage and salary payments to supervisory and non-supervisory employees. Total earnings should equal gross earnings received by employees from the utility. Prorate earnings of employees whose time is allocated to, or from, other utility or government operations. Please include paid time off. Annual earnings does not include medical coverage or other benefits.

Full-Time:

Part-Time:

10. Total Annual Hours Worked (Electric Employees): *

Provide the total number of hours actually worked during 2021 for all full-time and part-time employees and contract labor. Include only time on duty. Do not include time paid but not worked, such as vacations, sick leave, holidays, etc. Obtain hours worked from payroll or other time records wherever possible. If hours worked data are not maintained separately from hours paid, please enter your best estimate on the basis of scheduled hours. For example: if 10 employees worked an average of 40 hours per week for 50 weeks, total hours worked would be $10 \times 40 \times 50 = 20,000$.

Full-Time:

Part-Time:

11. Total Average Number of Employees (Contract Labor): *

Report information for persons (or full-time equivalent) working under contract to the utility on an on-going basis. This includes work that is ongoing on a limited or as needed basis. This would include jobs such as tree-trimming or facility maintenance, but would not include consultants or others working on a temporary basis. If an agency is used for contract labor, please include the total amount paid to the agency in the wage figures. For questions regarding contract labor, distinguish between contract employees for whom the utility is responsible for supervising day-to-day activities, and contract employees primarily supervised by the contracting company.

Contract Employees Supervised by
Utility:

Contract Employees Supervised by Contracting

13. Total Annual Earnings (Contract Labor): *

Employees Supervised by Utility:

Employees Supervised by Contracting
Company:

14. Number of Power Production Employees: *

NOTE: Power Production Employees are those employees who are directly involved in the generation of electricity (generally, power plant employees). Include all employees involved in operation and maintenance of power generating facilities. If your utility has no electric generation, then you should have no power production employees.

Full-time:

Part-time:

Contract

15. Number of Meter Readers: *

If responsible for meters other than electric, prorate employees allocated to electric only. If you deployed smart meters and no longer employ field meter readers, please enter zero.

Full-time:

Part-time:

Contract:

16. Distribution Lines (up to 69 kV) *

Circuit miles include the total length in miles of separate circuits regardless of the number of conductors used per circuit. We are looking for distribution lines as the utility defines it as long as it is not greater than 69 kV.

Total Distribution Line Circuit
Miles

17. Total Electric Utility Uncollectible Accounts (FERC 904) *

18. Total Electric Utility Debt Service Payments on Long-Term Debt *

Debt Service - The amount necessary to pay principal and interest on outstanding long-term debt.

19. Capital Expenditures (report capital expenditures for 2021 only) *

Part III. Financial Data

20. Total Current and Accrued Assets *

21. Total Assets and Other Debits *

22. Total Long-Term Debt *

23. Total Current and Accrued Liabilities *

24. Electric Operating Revenue (Include only revenue from sales to ultimate customers and sales for resale) *

25. Depreciation Expenses *

This includes amortization expenses.

26. Net Electric Income (Electric Revenue - Electric Expenses) *

27. Interest payment on Long-Term Debt paid during fiscal year*

Include the amount of interest on outstanding long-term debt issued or assumed by the utility.

28. Net Income (Net Electric Income + Other Electric Income - Electric Deductions - Taxes) *

29. Purchased Power Expenses *

30. Total Electric Operation and Maintenance Expenses (sum of Total Production, Transmission, Distribution, Customer Accounts, and A&G Expenses) *

Total O&M Expenses must equal sum of individual operation and maintenance categories.

Total Production Expenses (Operating costs for generation must include purchased power expenses as well as all power generation fuel costs)

Transmission Expenses

Distribution Expenses

Customer Accounts Expenses

Administrative and General Expenses

.....
Total : 0
