

Crossarm Relocate

Chief Judge: Drew Jordan

(Apprentice Event)

Mean Time: 8 minutes

Drop Dead Time: 10 minutes

Event Summary:

The apprentice will relocate a wooden 8-foot arm 180 degrees from its original location.

Event Specifications:

1. Apprentice will remove both the arm & brace bolt, rotate the arm 180 degrees either direction (their choice) and reinstall using same hardware.
2. Time starts with the judge signals with the apprentice standing an arm's length from the pole with the fall arrest system detached from the pole. Time stops when both feet are on the ground. The fall arrest must remain attached for proper adjustment verification by the event judge.
3. The Apprentice must wear rubber gloves ground to ground.
4. The apprentice can start with their tools on.
5. The arm will be A 8-foot arm with two 12kv polymer post insulators on it. Bolts will have 2" square washers on them.
6. All washers will be square with the arm and pole. All nuts will be tightened with a wrench. Do not over-tighten for the next competitor.
7. You will not carry any extra nuts or washers with you. If you drop something you need to have a handline and material bag with you, so the judge can send the material back up to you. Handline must be attached to the pole at working height by means of a sling.
