## What is the Engineering & Operations Conference?

It's public power's conference for professionals who design, develop, and maintain a significant portion of the nation's electric system. Through pre-conference seminars, keynote addresses, and breakout sessions, the conference provides education on the critical issues facing the people most responsible for keeping the lights on.

## What is the American Public Power Association?

We're the voice of not-for-profit, community-owned utilities that power 2,000 towns and cities nationwide. We represent public power before the federal government to protect the interests of the more than 49 million customers that public power utilities serve and the 93,000 people they employ. Our association advocates and advises on electricity policy, technology, trends, training, and operations. Our members strengthen their communities by providing superior service, engaging citizens, and instilling pride in community-owned power.

## Why should my company participate?

You'll enjoy exclusive branding and networking opportunities with people who make and influence purchasing decisions for communications and control, environmental services, generation and fuel, physical and cyber security, system planning, supply management, and transmission and distribution.

Thank you 2019 sponsors!
