- Why wellness programs
- Details of programs
- Progress to date

- gcohen@beld.com – 781.348.1125

Braintree Electric Overview

- Founded in 1892 by Thomas Watson
- 8 miles south of Boston
- 16,500 customers - 35,000 residents
- Vertically integrated – Generation to meters
- Governance – 3 elected light board members
- Broadband business competes with Comcast and Verizon

Energy Wellness Programs

Energy-saving programs

BELD is committed to helping you save energy. Our business is generating and delivering electricity, but our first concern is our customer. We want you to live and work in a clean environment, with money in your pocket. Encouraging you to save energy helps make that a reality. Click on a topic below for more information on our energy-saving programs.

- Customer|Connect
- Braintree Drives Electric
- Customer solar programs
- Energy Smart Home
- SmartSavings (smart thermostat program)
- Appliance rebate
- Energy education
- Braintree Re-leaf
- Technical assistance

List of newly launched programs

- Residential Community Solar
- Commercial Community Solar launch date:
10/1/18
- Battery Storage for Commercial accts launch
Date: 10/1/18
 - EV Incentive Programs
 - Private Solar Programs
- Smart Savings (thermostat control) for central
A/C only launched 6/1/18

Why have community initiative programs?

- Clean energy initiatives should be one of our main focuses
- Customers want to be “green”
- Community Solar projects for those that can’t or won’t install solar but want to be “green”– renters, position of roof, etc.
- Battery Storage are for customers that can’t “shave”/modify their behavior
- Electric vehicles are coming
 - MA goal: 300,000 EVs by 2025 influence when charging occurs (off peak)
- Summer Peaker – HVAC Thermostat control can make a difference
- Private Solar – benefits of solar with some type of pay back from utility

Engaging Customers

A monthly newsletter for BELD & BELD Broadband customers, published September 2018

Public Power Week—save the dates

Celebrate Public Power Week with BELD! This annual celebration is observed the first week of October by 2,000+ utilities that collectively provide electricity on a not-for-profit basis to more than 47 million Americans. BELD is a public power system controlled by the community it serves. This provides our town with important benefits not enjoyed by customers of private, investor-owned utilities.

In partnership with the Department of Elder Affairs, we'll host our popular annual Senior Breakfast Tuesday, Oct. 2. Come to 71 Cleveland Ave. for a tasty meal prepared and served by the Braintree Rotary Club and hear a BELD representative give an overview of what's new at the Light Department. There'll be giveaways and drawings as well. Two seatings will be available, 8 and 9:30 a.m., so please call 781.848.1963 to make your reservation.

Look for the BELD tent at the Farmers Market between 9 a.m. and 1 p.m., Saturday, Oct. 13. We'll be providing information on our new broadband offerings and other services, as well as our partnership with Braintree Drives Electric (BDE), a local initiative designed to help Braintree residents take full advantage of all the benefits of driving electric vehicles. Market-goers can pick up giveaways, and BELD customers can enter our free drawing exclusively for Braintree residents for a chance to win a "Taste of the Market" basket. Bring the completed ticket on the bill insert included with this newsletter to enter!

For information on Public Power Week, visit our website at www.beld.com.

Extra fees add up

Campanelli Drive solar project update

SunRaise Investments and BELD announce the completion of a new shared community solar project on Campanelli Drive. SunRaise constructed, financed, and owns the 2,443.5-kilowatt project, which consists of more than 6,000 solar modules and is expected to generate 2,937 gigawatt-hours (GWh) of electricity per year.

BELD will purchase all the electricity from the solar project, which is one of the area's largest, and send this clean power to businesses in the area through a Community Solar offering. The participating businesses will enjoy a stable and reduced clean power rate for a period of 10 years.

"At BELD, we're always looking for ways to increase our supply of renewable energy," said BELD General Manager Bill Bottiggi. "This project adds significantly to the supply of solar power we are able to offer the community."

The environmental impact of the project is substantial and measurable. The 2,937 GWh of annual generation is enough to power 325 average Braintree homes for a year and translates to 4.82 million pounds of carbon dioxide equivalent. This compares to 2.4 million pounds of coal burned.

To see a video of the project, visit <https://vimeo.com/276769410>.

Did you know that Xfinity charges \$6.95 a month for Regional Sports Networks (including NBC Sports Boston, which is owned by Comcast), and \$9.95 a month for High Definition cable service? That's more than \$200 extra a year just to have access to these services! BELD Broadband has never charged these extra fees. Call us at 781.348.BELD (2353) to learn more ways we can save you money on your monthly broadband bill.

The Good Neighbor Energy Fund is open

The Massachusetts Good Neighbor Energy Fund (GNEF) is available to all eligible candidates. The Fund helps households in temporary crisis with the payment of their energy expenses. GNEF's "Give the Gift of Warmth" campaign goal this year is to raise \$500,000 and assist more than 1,500 households.

The Fund is often the last resort for families who do not qualify for federal and state assistance programs. The Salvation Army, which administers the Fund,

pays energy providers directly for households with a gross income between 60 and 80 percent of the state's median levels. For example, a household of four needs a total gross yearly income between \$66,115 and \$88,153 to qualify.

This campaign year's Fund disbursement is \$425 per eligible household per heating season. To apply to the Fund for assistance, visit your local Salvation Army Corps Community Center, or call 800.334.3047.

Participating energy companies support their respective customers' generosity through various giving programs. Braintree residents who wish to support the Fund can "Give the Gift of Warmth" by donating online at magoodneighbor.org or mailing a check to "Good Neighbor Energy Fund," c/o The Salvation Army, 25 Shawmut Road, Canton, Massachusetts 02021-1408.

Want to add an EV charging station to your business?

While Braintree's residents continue to drive electric vehicles (EV) at a higher rate than other towns on the South Shore, local organizations are jumping on the EV bandwagon. This summer, two local religious institutions installed electric vehicle charging stations.

The Archdiocese of Boston (66 Brooks Drive) and Tian Ann Temple (49-59 Hayward Street) approached Braintree Drives Electric with a desire to provide electric vehicle charging to their employees and visitors. Both organizations have joined the growing movement of publicly accessible charging stations in the area. By expanding charging options, these organizations are helping to reduce carbon emissions in town and fight climate change.

If you have a business located in Braintree, you can also join this effort. Providing chargers for visitors and patrons is an excellent way to attract business and to commit to a cleaner, healthier community.

Of course, residents are also encouraged to join, and can visit www.BraintreeDrivesElectric.com to learn more about how to enroll vehicles and receive charging incentives.

the call today! This service is funded and supported by the Braintree Community Partnership on Substance Use.

First Congregational Church Autumn Fair
Sat. 10/27; 9 a.m.-2 p.m., 12 Elm St. Free event with vendor tables including Scentry, Use-orme-Books, The Gifted Heart, silent auction, themed gift baskets, children's activities, a lottery tree & several food options.

Braintree recycling note

Please don't put plastic bags in recycling carts—they break down processing equipment & increase our costs.

Smart Thermostat – communicating w/customer

Participating utilities

Two ways to get involved!

①

I **already have** a qualified smart thermostat

Customers that have already purchased and installed one of the following devices can sign up through these links.

This section displays three smart thermostat brands with their respective sign-up buttons:

- nest**: Shows two thermostat models (one with a blue display showing 78, one with an orange display showing 70) and a teal "SIGN UP" button.
- simple™**: Shows two thermostat models (one with a black display showing 74, one with a white display showing 74) and a teal "SIGN UP" button.
- Honeywell**: Shows two thermostat models (one with a blue display showing 72, one with a white display showing 72) and a teal "SIGN UP" button.

②

- Customers sign up either at our site or thermostat manufacturer site
- Very simplified approach
- They can even order on line and sign up for install by professional

I **need** a qualified smart thermostat

Customers that do not have a device will need to purchase one. Links to buy are on the left. If you want a professional installation for a Simple thermostat, sign up on the right and we'll follow up with additional purchasing instructions.

This section provides purchase and installation options for new users:

- Install it yourself!**: A vertical column of three options:
 - BUY NEST**: Accompanied by images of two Nest thermostat models.
 - BUY SIMPLE**: Accompanied by images of two Simple thermostat models.
 - BUY HONEYWELL**: Accompanied by images of two Honeywell thermostat models.
- Get a free professional installation!**: A separate option on the right, accompanied by images of two Simple thermostat models and a teal "SIGN UP" button.

Smart Thermostat – communicating w/customer

Dear *[FNAME]*,

Congratulations, you're approved! Your account is eligible for the SmartSavings Program!

You'll receive your sign-up bonus in the form of a electronic gift card soon. As a reminder, participation in program Community Energy Hours qualifies you for additional gift cards! So what are Community Energy Hours?

Community Energy Hours help lower demand during peak energy hours, like those hot summer afternoons when everyone's cranking up their air conditioning.

Smart thermostats help you use less energy during those peak hours by automatically cooling your home ahead of time.

You can expect up to 15 four-hour program events each year; these events can take place from 12–7 p.m., and only on weekdays.

You'll receive an electronic \$20 gift card at the end of the summer for your participation.

You can override your smart thermostat if you're uncomfortable, and there's no penalty for not participating in a program event.

As always, if you have any questions, please contact us at hello@thesmartsavingsprogram.com. In addition, please send us a note if you move to a new address.

Thanks for your participation!
SmartSavings Customer Care

- Customers sign up either at our site or thermostat manufacturer site
- Receives email with details of program
- Rebates for thermostat purchase are issued on bill
- No more than 15 events in a given season

Smart Thermostat – communicating w/customer

Dear Gail,

We're writing to let you know that Community Energy Hours are scheduled for today, 08/28/2018, during the hours of 4:00 PM - 6:00 PM.

During this event, we will make small adjustments to your thermostat's set point in order to reduce your energy usage. This helps to make the grid more resilient, and your community more sustainable.

You can expect your home to raise only a few degrees during an event, but if you find yourself uncomfortable, you can always opt-out of an event by adjusting your set point.

As a reminder, Community Energy Hours can occur weekdays between June 1 and September 30, between noon and 7 p.m. They will last no longer than four hours, and SmartSavings will call no more than 15 events.

Thank you for helping to save energy!
SmartSavings Customer Care

- Event notifications
- Send email advising of upcoming event
- If customers bypass thermostat control, we are notified

Progress to date

- 90 Residential Community Solar customers signed up – 10% of panels leased
- EVs - Over 300 residents engaged with program, 70+ at home test drives, 150+ rides/drives at events resulting in **60** enrolled in off peak load control program
- 30 Private Solar customers (commercial and residential)
- 132 enrolled in Thermostat Program (launched 6/1/18)
- Just won grant to Study Floating Solar – potential location Reservoir

Billing Strategy

- Keep it simple – clear line item credit
- Programs available to both residential and commercial
- Customers could be part of multiple Energy Smart programs
- Appliance Rebate credits get applied to customer bills and not have to wait for rebate check
