

Public Power Cybersecurity Roadmap

Western Regional Municipal Cybersecurity Summit

August 22, 2019

Christopher Kelley, PMP ckelley@beamreachgroup.com

Beam Reach Consulting Group

- Strategic planning, project management support for energy infrastructure and resilience programs
- Staff have supported over 75 advanced electric grid projects across the US
- Program management for energy infrastructure programs > \$7.9 billion
- APPA Associate Member, WOSB

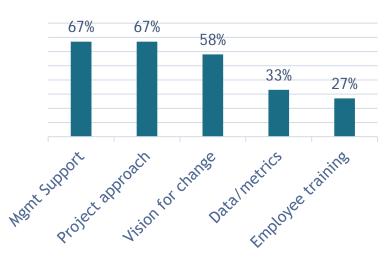

Overview

- ► About the Cybersecurity Roadmap Advisory Council
- ► Initial findings from the CRAC team
- ► Introduction to the Public Power Cybersecurity Roadmap
- Next Steps

Public Power Cybersecurity Roadmap Advisory Council

Designed approach to cybersecurity maturity implementation

- Establish management buy-in
 - Security program
 - ► Budget and resources
- Assess the need and set the vision

- Prioritize and treat cybersecurity maturity like a project
- Develop successful employee training
- Establish data/metrics for security program

Public Power Cybersecurity Roadmap

- Clear actions and outputs for small- to med-public power utilities
- Focused on priority pathways

- Driven by Cybersecurity Roadmap Advisory Council
- Informed by industry

Public Power Cybersecurity Roadmap bridges the gap between assessment and action.

Getting Started on the Roadmap Path

- ► Target profile for small-to-medium public power utilities
- Dedicate time to planning, especially risk assessment and measurement
- Perform baseline assessment and consider independent review/assessment
- Follow a risk-based approach
- ▶ Gain senior management support and buy-in
- Establish a project-based approach to cybersecurity
 - Develop cybersecurity strategy
 - Create data and metrics to measure security program
 - Prioritize actions to take
 - Create a project management plan
 - ► Include communications, outreach, and continuous learning

Workforce management and development

Developing a culture of awareness and building knowledge

Assess

- ID weak knowledge areas
- Consider independent assessments

Policies

- Data classification
- Incident response
- Password mgmt
- Enforcement strategies

Organizationa I Design

- Cybersecurity lead with appropriate org purview
- Create clear roles and responsibilities for sercurity

Training

- Security training strategy
- Incentives for staff
- Educate board/leadership via workshop or dedicated training

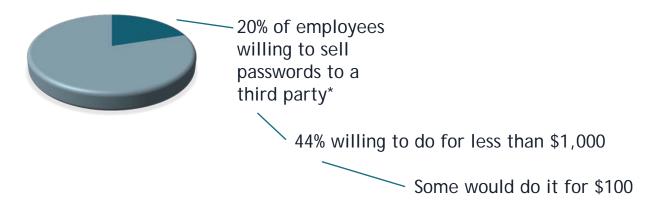

Outreach and Partnerships

- Regular staff and key stakeholder communication
- Real examples, creative messaging
- Contacts with cyber groups and law enforcement
- Education/training partnership with local educational institutions

Why is (organizational) Change Management so important to cybersecurity projects?

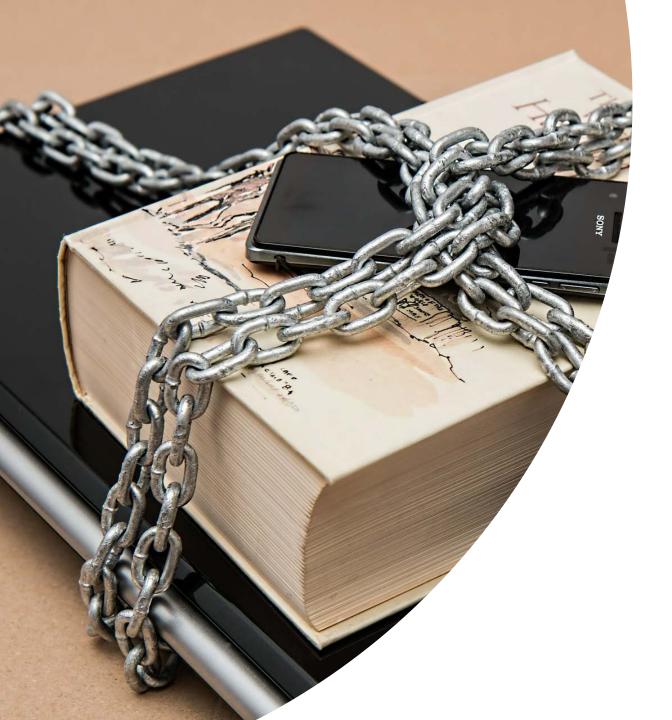

Focus on technology > Impact on people?

People make your organization work (or fail)

Trap: The value of technology improvements are self-evident

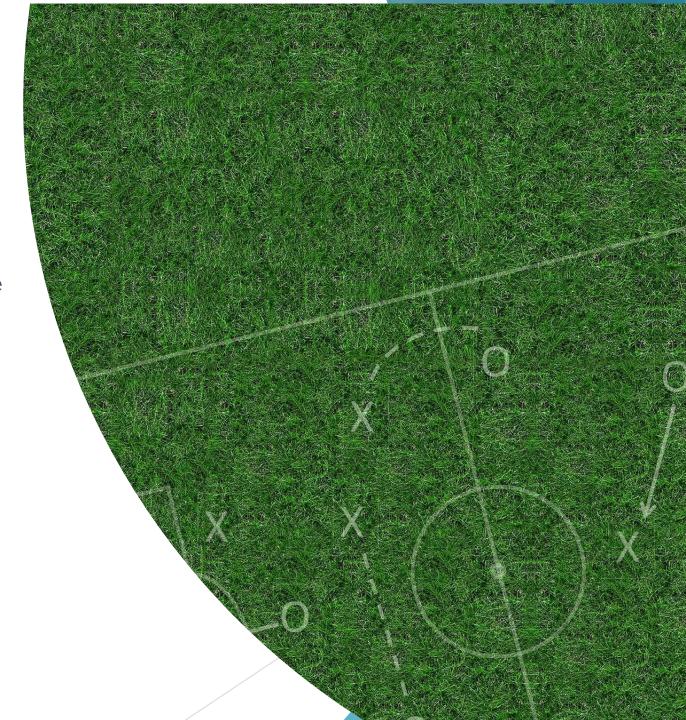

Change Management Challenges for Cybersecurity Adoption

- Security is the enemy of productivity!
- Cybersecurity has never been an issue for us before.
- We are a small utility in a small town. We're not on the radar screen.
- We can't afford it!
- I already have 3 day jobs. How do I have time for one more?

Playbook and Preparation

Incident response plan

- Make policies and actions very clear in advance (e.g. pre-approval for kill switch authority)
- Clear roles and responsibilities (staff, SMEs, vendors)
- Engage and share plan with law enforcement/FBI/National Guard
- Weigh pros and cons of engaging outside entities and be clear on actions for the plan.
- Use cyber mutual aid as both a communications and resource support tool
- ► Integration with corporate business continuity and emergency response plans
- ► Reinforce the plan through training, exercises
- ▶ Leadership signoff

Evaluate

- Use Scorecard and other means to review internal and external factors influencing state of cybersecurity
- Identify two or three promising opportunities
- Advocate chosen opportunities to organizational management

Formulate

- Design a project-based plan to improve cybersecurity in chosen opportunities.
- Determine: finite time frame, discrete goals and milestones to measure progress, and metrics for achievement

Integrate

- Implement practices defined by your plan into the operation of your organization
- Engage employees and embed the organizational change into the company culture to ensure these cybersecurity
 - improvements last

Activate

- Put the plan into action
- Identify and obtain the resources needed (e.g. funds, expertise)
- Assign clear owners and inform leaders and staff of changes to come
 - Perform regular status checks against defined goals and milestones

Stage 1: Evaluate

Identify target goal; develop strategic plan for next 3-5 years

Assess current state of cybersecurity

Identify connects in the content of the connects of th

Identify sponsorship, stakeholders, and givens; gain initial support from leadership

EVALUATE

- Use Scorecard and other means to review internal and external factors influencing state of cybersecurity
 - Identify two or three promising opportunities
 - Advocate chosen opportunities to organizational management

Promote continuous learning to maintain an up-to-date awareness of the cybersecurity environment

Stage 2: Formulate

Get IT/OT
managements on
same page with Bridge
Committee

Appoint a CISO and integrate SCADA systems as IT

1

Establish
project-based
approach, include:
project scope,
communications
plan, project
schedule, project
budget, and project
risk plan

FORMULATE

- Design a project-based plan to improve cybersecurity in chosen opportunities.
- Determine: finite time frame, discrete goals and milestones to measure progress, and metrics for achievement

٦

Hire staff accordingly

Implement training for management,

technical, and general staff

Stage 3: Activate

2

Reward compliance among personnel; sanction those noncompliant with new policies 3

Develop a cyber incident response plan using the Cyber Incident Response Playbook as reference

1

Come up with ongoing, enforceable policies for all personnel

ACTIVATE

- Put the plan into action
- Identify and obtain the resources needed (e.g. funds, expertise)
- Assign clear owners and inform leaders and staff of changes to come
 - Perform regular status checks against defined goals and milestones

4

Develop a
communications
strategy to handle
potential cyber
incidents; include
internal and external
communication
plans

Stage 4: Integrate

5

Put previously identified policies and procedures into regular use

1

Move cybersecurity tools and systems into production

INTEGRATE

- Implement practices defined by your plan into the operation of your organization
- Engage employees and embed the organizational change into the company culture to ensure these cybersecurity improvements last

Look into a methodology for organizational change management and apply this based on what works for

the organization.

Next Steps

Next Steps

- The Roadmap serves as a guide
- Success of any project lies in its execution
 - ► The Roadmap should help chart a path to an improved state in the future.
- Communication among peers and collaboration with APPA and experienced subject matter experts may be necessary,
- Working together we can improve the cybersecurity of the entire public power sector

- Maintain a posture of continuous cybersecurity improvement, no matter the size of your public power utility.
- Take advantage of resources and tools available to public power utilities referenced in the Roadmap.
- ► For the latest recommendations visit APPA's website at: https://www.PublicPower.org or email Cybersecurity@PublicPower.org.
