

2018 Sidewalk Guy Chief Judge: Darin Koehler (Apprentice Event)

Mean Time: 15 Minutes

Drop Dead Time: 20 Minutes

Event Summary:

The Apprentice will install a new guy wire and sidewalk guy bracket on a partially framed 40' pole. After installing the equipment, the guy will be placed under tension and when completed, judged for proper installation. The Apprentice shall return the pole back to normal before exiting the event.

Event Specification:

1. See General Rules
2. The Apprentice will be given a five minute time to ask questions and lay out material. No material may be assembled during the five minute question time. NOTE: Workers shall not wear their climbers while working on the ground. (Section 507.3-f 15th Ed of the APPA safety manual)
3. Event timing begins when the judge signals the Apprentice to begin.
4. All material shall be pulled up the pole using your hand line.
5. The Apprentice shall climb the pole, pull up the guy wire and attach it to the existing Guy Hook assemble using a pre-form.
6. The pole plate will be existing on the pole, all the Apprentice has to do is insert the pipe and tighten the set screw. (**The sidewalk guy assembly pipe must be level within two inches**)
7. The guy assembly will then be placed under tension using a chain or cable hoist. (A strap hoist is not an approved tool for making up down guys).
8. The sidewalk guy is complete when all tools have been removed.
9. Time stops when the Apprentice has completed the event and calls for time to stop.
10. Judging will continue until all materials and tools are packed up and the event site is restored to its original condition. All material must be lowered to the ground using the hand line.
